## Professional Summary

I'm an IT student at Maseno University with hands-on experience in web development. I enjoy building clean, functional websites and I'm currently specializing in Dart and Flutter. I've worked on real projects, helped organize tech events like hackathons, and love being part of communities that solve real problems through tech. I'm passionate, a quick learner, and ready to grow in the tech space.

## Technical Skills

| | | |
|---|---|---|
| Javascript | Python | CSS |
| Java | Git and Github | SQL |
| C | HTML | |

## Soft skills

| | | |

## Projects

**Shinelooks**
This project aims at rewarding loyal customers in a shop where they access their services. Once they login,they are given access to a the shops system where they can record their visits and earn points which can be later be redeemed and be used to pay for services whenever they want. [Shinelooks](#)

**MUCISA Hackathon**

I participated in organising a hackathon which brought together students and industry experts shocasing projects in different Sustainable Development Goals by the UN. This project's aim was to enhance technology for innovators.

**Extracurricular Activity**

Leadership
